

Cemtec Hoof Pad Pro Now also available in hard!

Professional hoof pads made of transparent high quality and durable polyurethane. The egg shape makes the pads reversible and more usable. Both sizes are perfect in dimension, reducing waste of material and money. Transparent so one sees when filling packing material under the pad. Also built in grip on hoof side that keeps the preferred filling material better in place. These hoof pads are suitable to use with 2-component polyurethane hoof pad products and hoof silicon.
